## For Custom Design Assistance, Pricing and Orders

ColorMill EPDM, manufactured exclusively by ECORE International™, is made from the highest quality materials to provide the most UV stable and abrasion resistant color granules on the market. A state-of-the-art production process ensures color vividness, low VOCs and a smooth finish. Comprised of 30% pre-consumer waste, ColorMill is the only EPDM in the U.S.A. to boast recycled content.

With ColorMill, the possibilities for product innovations are endless. Use the custom color palette to select what color granules will create the custom pattern of your choice.

1. Choose 2 or 3 colors from the palette.
2. Specify percentage of color in 5% increments. You must allow a minimum of 5% SBR tire rubber for production purposes.
3. Contact your local sales rep for information on laser proofs, actual samples, minimum order quantities, delivery schedules and pricing.
