camber

Camber is elegant and chic, with distinctive convex curves and matching arms that create a sophisticated seating solution for executive seating. A plunging, full-size waterfall seat, self-adjusting strap system, and three layers of foam make for a supportive, plush, comfortable sit. Camber provides advanced back support with a built-in webbed lumbar system. Available in high-back or guest/side chair, with optional swivel-tilt or knee-tilt controls and three arm choices.
