

insync™

highmark  
seating made simple

insync™

InSync™ embodies the next evolution of innovative chair design. Its weight-activated Body Balance control is breakthrough, and the chair is simple, intuitive and easy to use. There is no tension adjustment – and just one lever to adjust the seat height. InSync delivers high-end design at an affordable price. The introduction of InSync raises the bar in innovative chair design, serving as a new industry benchmark for technology and simplicity.

< Adjustable Lumbar available

insync™

InSync comes standard with a knit back that's available in several color options, and offers many fabric choices for the seat. Choose mid-back or high-back, fixed arms or height and width adjustable arms. Other options include adjustable lumbar and high-profile polished aluminum base, two frame finishes and five knit colors.
