TOP WEAR LAYER

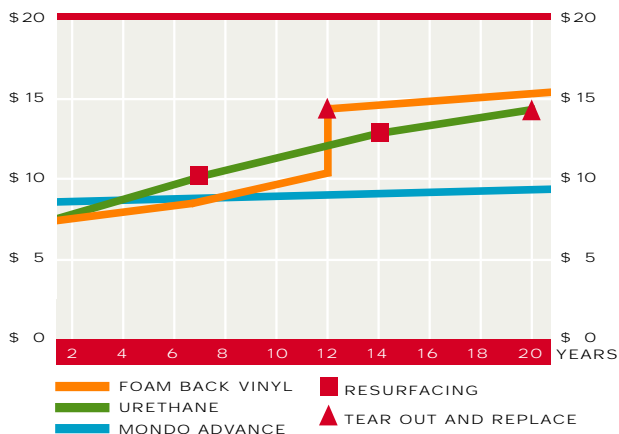

- Optimal friction characteristics to allow appropriate performance such as fast acceleration and quick directional changes.
- **Highly durable**

- Non porous surface layer for **greater ease of maintenance**
- Requires no coatings
- **Unmatched wear warranty**

PROJECTED LIFE-CYCLE COSTS

Price listed in current U.S. market • per S.Q. U.S. \$

MIDDLE RESILIENT LAYER

- Disperses the load of the athlete's foot on the surface to extend the area of impact loading, diminishing or virtually **eliminating the possibility of the floor bottoming out.**
- **Versatile & multipurpose**
Point-load resistant allowing gymnasium to be used for all types of activities.

BOTTOM LAYER

- Geometric construction that allows superior deformation of the system and provides **exceptional cushioning and excellent energy return.**
- Tremendously reduces injuries when falling, compared to wood.
