PUTNAM SCHOOL DISTRICT

MAPLE LOOK

"Throughout Putnam School District, some of our school's gymnasium floors were old and not working well. With so much at stake, our District saw this as a unique opportunity to upgrade these facilities. From experience, we know our school gym floors take a lot of abuse. Our gymnasiums are not just for basketball and volleyball. **Our schools use their gymnasiums for any number of activities and tables and chairs are constantly pushed around on them.** With this in mind, we needed to find durable flooring that could withstand the abuse of a gymnasium turned multipurpose room without cutting or tearing. With Mondo, we found the exact surface we were looking for. We selected Mondo's wood grain design. This look definitely upgraded the entire appearance of all our gymnasiums. In fact, with the way we went about it, our District is leveraging a more durable, better looking and maintenance-friendly solution throughout all our schools. With our installations occurring almost simultaneously with the same surface, we also feel it was fairer to our school administrators, teachers and students. **Because of the low maintenance, we saved money on hours of maintenance and material too."**
